

Reconstruction and Smile Makeover

Things do go wrong sometimes. We all are guilty in one time or another of letting our problems go too far. And when you need a thoughtful approach to a multitude of problems we can help. This is like fixing a house. You start with foundation, making it strong again; you fix and rebuild the steps, the walls and the roof, and then you bring in new furniture in. All in this order. That means - preserving and restoring the health and then provide the best cosmetic and restorative alternatives so that you can enjoy a new and improved you. We have the training, skills and clinical expertise in all aspects of modern dentistry in order to do it. But we would not call it a makeover if we just fill the cavities in your teeth and replace the ones that are missing. We'd recreate your smile in a way that gives you a new and enhanced image. Be the best you can be.

Testimonials

"..my mouth was such a mess. I was afraid and in denial until you've been so thorough and understanding in your explaining of my problems and the practical solution... I am glad I did it." —Mr. F. 38 y.o.
